

SPECIALISTS IN FRAMELESS GLASS & STEEL PROJECTS

INSPIRED BY DESIGN. DEFINED BY DETAIL. TAILORED TO PERFECTION

01 / ABOUT US

# SPECIALISTS IN FRAMELESS GLASS & STEEL PROJECTS

At **Capra Projects**, we take pride in **creating frameless glass and architectural steel solutions** that are both functional and visually refined. We approach every project with a hands-on mindset, focusing on **precision, detail, and clean design** to bring each space to life.

We work closely with our clients, architects, and builders to ensure every installation is carefully considered—from concept through to completion. Whether it's frameless glass balustrades, door systems, or custom steelwork, our goal is to deliver **results that feel seamless, modern, and built to last.**

For us, it's not just about installation—it's about creating spaces that feel open, considered, and effortlessly integrated, with a strong emphasis on **quality craftsmanship and attention to detail.**

# FRAMELESS GLASS SOLUTIONS

We specialize in premium frameless glass solutions that bring modern luxury, clarity, and elegance to architectural spaces.

With a focus on clean lines and seamless design, our frameless glass installations transform residential, commercial, and industrial environments into light-filled, sophisticated spaces.

01 / MATERIALITY

## CUSTOM SOLUTIONS

From frameless enclosures to bespoke pivot doors, our products are tailored to reflect the unique character of your build.

### OUR OFFERINGS INCLUDE:

- Glass balustrades & railings
- Frameless glass doors
- Shower doors & enclosures
- Office cabin glass systems
- Frameless glass partitions

# OUR FRAMELESS GLASS SOLUTIONS

Elevating residential and commercial spaces with structural integrity and unobstructed views. Our frameless systems are engineered for safety and aesthetic excellence.

## INTERIOR BALUSTRADES

Enhance openness, light, and modern architectural flow. Each system delivers a clean, minimalist finish and seamless integration within the space.

## EXTERIOR BALUSTRADES

Seamless safety solutions for balconies, patios and pools using toughened safety glass and precision steel components.

## CURVED FRAMELESS GLASS

Digitally measured and precision-crafted, each installation delivers smooth curves, structural integrity, and a striking modern finish.

## FRAMELESS GLASS DOOR SYSTEMS

Seamless transitions between interior and exterior spaces. Each system delivers smooth operation, durability, and a clean, minimalist architectural finish.

## BESPOKE SHOWER ENCLOSURES

Minimalist design meeting technical precision. Our enclosures are custom-fitted for a perfect architectural finish in any space.

## SLIDING DOOR SYSTEMS

The doors operate on high-performance sliding tracks with precision roller mechanisms, ensuring smooth, quiet, and reliable movement. Concealed fixings and minimal framing maintain clean sight lines.

engineered for precision, durability, and seamless architectural integration. Manufactured using toughened safety glass, with laminated options available, each system is designed to meet structural and safety requirements.

## 01 / FRAMELESS GLASS SOLUTIONS

# STACKING DOOR SYSTEMS

Engineered for flexibility, precision, and seamless architectural integration. These systems are designed to meet structural and safety requirements while maintaining minimal visual obstruction.

The panels operate on top-hung or bottom-rolling track systems with precision-engineered roller assemblies, allowing multiple panels to stack neatly to one side and create wide, unobstructed openings. Concealed fixings and minimal framing ensure clean sightlines, while integrated weather seals and drainage solutions provide durability and protection against the elements.

## PIVOT DOOR SYSTEMS

The doors are supported by high-performance pivot mechanisms, allowing smooth, controlled rotation on a central or offset axis. Concealed floor springs and top pivots ensure stability and seamless operation, while minimal hardware maintains uninterrupted sightlines.

## 01 / FRAMELESS GLASS SOLUTIONS

# SHOWERS ENCLOSURES & SCREENS

Engineered for precision, durability, and a clean architectural finish. Manufactured from toughened safety glass, each system is designed to meet safety standards while maintaining a minimalist, open aesthetic.

Installations utilise precision hardware and concealed fixings to minimise visual clutter, with options for hinged, sliding, or fixed panel configurations. Integrated water seals, channels, and drainage detailing ensure effective water management without compromising the frameless appearance.

## 01 / FRAMELESS GLASS SOLUTIONS

# BALUSTRADES

Balustrades can be installed using recessed base channels, surface-mounted systems, or side-mounted fixings, with concealed hardware to achieve a seamless, minimalist finish. Precision installation ensures accurate alignment and a continuous glass line, enhancing both safety and visual clarity.

Digitally measured and fabricated to exact tolerances, each balustrade delivers strength, durability, and a refined architectural aesthetic, making it ideal for balconies, staircases, and terraces.

## 01 / FRAMELESS GLASS SOLUTIONS

# CURVED GLASS

All glass is digitally measured and custom-formed, ensuring precise radii, accurate tolerances, and seamless alignment on site. Systems can be integrated into balustrades, facades, and feature elements.

The result is a technically refined solution that delivers structural integrity, fluid design, and a distinctive architectural statement, enhancing both form and function.

# CUSTOM STEELWORK

Alongside our glass expertise, we provide professional steel fabrication to support and enhance our installations. Our precision-crafted steel components ensure durability, strength, and a seamless integration with the sleek beauty of frameless glass.

02 / MATERIALITY

## SPECIALISED FABRICATION

We bring specialised expertise in high-end glass and steel, ensuring every installation meets the most rigorous architectural standards.

### OUR EXPERTISE INCLUDE:

- Balustrades & railings
- Steel privacy screens
- Steel pergolas & canopies
- Structural frameworks
- Custom fabrication works

# OUR STEEL WORK SOLUTIONS

Elevating residential and commercial spaces with structural integrity and unobstructed views. Our frameless systems are engineered for safety and aesthetic excellence.

## CUSTOM STEEL BALUSTRADES

Precision-fabricated and tailored to each project, our balustrades integrate seamlessly with modern spaces while delivering durability, safety, and a clean, contemporary finish.

## STAINLESS STEEL BALUSTRADES

Using premium-grade stainless steel, each system is precision-crafted to deliver a sleek, modern finish with long-lasting performance and seamless integration.

## STEEL GATES & SCREENS

Security with refined architectural design. Precision-crafted from premium-grade steel, each installation can incorporate clean lines or laser-cut patterns,

## PERGOLAS & AWNINGS

Enhance outdoor living spaces while complementing modern architecture. Precision-crafted from durable materials, each structure provides shade, protection, and a refined architectural feature

## BALUSTRADES

Fabricated from premium-grade mild steel and stainless steel, each balustrade is built to meet structural requirements while delivering a clean, modern aesthetic.

Systems can be custom-fabricated to suit site conditions, with options for vertical, horizontal, or custom infill designs. Finishes include powder-coated mild steel or brushed stainless steel, ensuring long-term performance and resistance to environmental conditions.

02 / CUSTOM STEEL WORK

## GATES, PERGOLAS & SCREENS

Manufactured from premium-grade mild steel, each structure is precision-crafted to meet structural requirements while complementing the overall design.

Gates and screens can incorporate clean linear profiles or laser-cut patterns, offering both privacy and a strong visual statement. Pergolas are designed to provide shade, structure, and outdoor definition, with carefully considered detailing to suit modern architectural environments.
