

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

BALUSTRADE CATALOGUE

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

We are a trusted name in the design, fabrication, and installation of premium frameless glass, structural steel, custom staircases, and aluminium doors and windows. With a commitment to precision engineering, modern aesthetics, and long-lasting durability, we deliver expertly crafted solutions that combine strength, safety, functionality, and refined architectural design.

FRAMELESS GLASS SOLUTIONS

We create sleek, modern glass systems that enhance natural light while maintaining structural integrity and safety.

Our offerings include:

Glass balustrades & railings | Glass doors (sliding & stacking) | Shower enclosures | Office cabin glass systems | Frameless glass partitions | Shopfront glass installations
• Minimalist design • High-grade hardware • Custom fabrication • Professional installation

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

We are a trusted name in the design, fabrication, and installation of premium frameless glass, structural steel, custom staircases, and aluminium doors and windows. With a commitment to precision engineering, modern aesthetics, and long-lasting durability, we deliver expertly crafted solutions that combine strength, safety, functionality, and refined architectural design.

STRUCTURAL STEEL WORK

We deliver strong and reliable steel structures tailored to meet project specifications and industry standards.

Our expertise includes:

Balustrades & railings | Steel privacy screens | Steel pergolas & canopies | Structural frameworks | Custom fabrication works
• Precision fabrication • Durable finishes • Powder coating • On-site installation

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

We are a trusted name in the design, fabrication, and installation of premium frameless glass, structural steel, custom staircases, and aluminium doors and windows. With a commitment to precision engineering, modern aesthetics, and long-lasting durability, we deliver expertly crafted solutions that combine strength, safety, functionality, and refined architectural design.

ALUMINIUM SOLUTIONS

We create refined aluminium door and window systems designed to enhance natural light, ventilation, security, and modern architectural spaces.

Our offerings include:

Aluminium sliding doors | Stacking & folding doors | Hinge doors | Sliding windows |
Side-hung windows | Top-hung windows | Fixed windows

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

We are a trusted name in the design, fabrication, and installation of premium frameless glass, structural steel, custom staircases, and aluminium doors and windows. With a commitment to precision engineering, modern aesthetics, and long-lasting durability, we deliver expertly crafted solutions that combine strength, safety, functionality, and refined architectural design.

STAIRCASE DESIGN & CONSTRUCTION

We design and construct custom staircases that combine structural strength, functionality, and refined architectural style.

Our expertise includes:

Straight staircases | Floating staircases | Cantilever staircases | Spiral staircases | Curved staircases |
Open-tread staircases | Steel & timber staircases | Custom staircase

PRECISION MEASUREMENT & DIGITAL TEMPLATING

PRECISION MEASUREMENT & DIGITAL TEMPLATING

Using advanced Prodim digital measuring technology, we capture highly accurate, real-time, three-dimensional measurements of curved staircases, landings, balconies, terraces, and walkways. This state-of-the-art templating system ensures millimetre precision, eliminating the need for physical templates and significantly reducing the risk of human error.

Complex radii and irregular curves are recorded with exceptional accuracy, allowing each 12mm toughened safety glass panel to be manufactured precisely to site dimensions.

The result is a seamless flow of glass that follows the natural contours of your architecture, delivering a flawless fit, refined finish, and uncompromising structural performance.

This precision-engineered approach provides:

- Accurate alignment along curved substrates
- Consistent glass tolerances
- Reduced on-site installation adjustments
- Enhanced structural integrity
- Seamless visual continuity

TOUGHENED SAFETY GLASS

TOUGHENED SAFETY GLASS (TEMPERED GLASS)

Toughened safety glass, also known as tempered glass, is specifically engineered for superior strength and safety. It is produced by subjecting standard annealed glass to controlled thermal or chemical treatments.

These processes compress the outer surfaces while placing the inner core under tension, making the glass up to five times stronger than standard glass of the same thickness.

WHY CHOOSE TOUGHENED SAFETY GLASS FOR YOUR PROJECT?

Toughened safety glass is the ideal choice for modern architecture, combining elegance, transparency, and exceptional strength. It provides the perfect balance between refined aesthetics and reliable performance.

Whether used for a side-mounted balustrade, frameless shower, or a statement glass feature, it delivers a durable, safe, and visually seamless solution designed to stand the test of time.

CLEAR TSG
(Toughened Safety Glass)

Clear Toughened Safety Glass offers exceptional strength and safety while maintaining a sleek, modern appearance. Virtually invisible within your architecture, it preserves open views and enhances natural light for a clean, minimalist finish.

GREY TSG
(Toughened Safety Glass)

Grey Toughened Safety Glass delivers a contemporary finish with a bold architectural presence. Offering enhanced privacy while maintaining light flow, it is an ideal choice for balconies and outdoor living spaces.

BRONZE TSG
(Toughened Safety Glass)

With its rich bronze hue, this glass option offers excellent solar control while adding warmth and depth to your design. A sophisticated choice, it enhances both contemporary and classic spaces with a distinctive decorative accent.

DIAMANT TSG
(Toughened Safety Glass)

DIAMANT is a premium extra-clear glass valued for its clarity and refined appearance. Its low iron content allows for higher light transmission, significantly reducing the green tint typically seen in standard glass.

STAINLESS STEEL BALUSTRADE HARDWARE

We use premium-grade 314 stainless steel hardware across our entire glass balustrade range, selected for its exceptional strength, corrosion resistance, and long-term durability.

Each hardware component can be tailored to complement your design vision. Choose from a flawless mirror-polished finish for a refined, high-end look, a brushed stainless steel finish for understated sophistication, or a powder-coated matte black for bold, contemporary contrast. For projects requiring a more personalised touch, we also offer powder coating in an extensive range of standard colours, allowing seamless integration with your architectural palette.

RECESSED GLASS BALUSTRADE

RECESSED GLASS BALUSTRADE

RECESSED GLASS BALUSTRADES

The Frameless Recessed Glass Balustrade represents the pinnacle of contemporary architectural design. Crafted from 12mm toughened safety glass, each panel is precision-engineered and seamlessly recessed into the concrete for a flawless, uninterrupted finish. For projects requiring a refined balance of openness and discretion, a grey glass option is available, offering subtle privacy while maintaining the sleek, frameless elegance.

RECESSED GLASS BALUSTRADE

RECESSED GLASS BALUSTRADE

Secured using a high-performance chemical grout system specifically formulated for structural integrity, the result is a strikingly clean aesthetic with exceptional strength and durability. With no visible brackets, posts, or fixings, this system delivers pure transparency — creating uninterrupted sight lines and enhancing the sense of openness and light throughout your space. It is the perfect choice for homes where views are to be celebrated, not concealed.

BASE MOUNT GLASS BALUSTRADE

BASE MOUNT GLASS BALUSTRADE

BASE MOUNT GLASS BALUSTRADES

Base Mount Glass Balustrades deliver a seamless fusion of structural performance and architectural elegance. Engineered with precision, each glass panel is securely anchored within a robust aluminum or stainless-steel base channel, eliminating the need for vertical posts and creating a completely frameless appearance. The result is uninterrupted transparency that maximizes natural light, enhances spatial openness, and preserves panoramic views.

BASE MOUNT GLASS BALUSTRADE | INSTALLATION OPTIONS

BM-CLR-BS-S-FIX

Base Mount Glass Surface Fix

The base mount channel is fixed directly on top of the finished floor surface using mechanical anchors.

Best For:

Retrofits and renovations
Concrete slabs
Projects requiring minimal structural alteration

BM-CLR-BS-E-FIX

Base Mount Glass Edge Fix

The base mount channel is fixed to the vertical face (edge) of the slab rather than on top.

Best For:

Balconies with limited floor space
Projects requiring maximum usable area
Cantilevered slabs

BM-CLR-BS-RECESS

Base Mount Glass Recess

The base mount channel is embedded into the concrete slab so only the glass is visible above floor level.

Best For:

High-end residential projects
Luxury developments
Minimalist architectural designs

SIDE MOUNTED GLASS BALUSTRADE

SIDE MOUNTED GLASS BALUSTRADE

SIDE MOUNTED GLASS BALUSTRADE

The Side Mounted Frameless Glass Balustrade are mounted to the side of staircase, landing, balcony or patio, providing an elegant and structurally sound barrier.

Aesthetically stunning by retaining a view or sense of space that other types of barriers simply cannot achieve.

12mm Toughened Safety Glass panels create a near seamless finish with a choice of different colours of side mounts, ranging from 304 grade stainless steel to black to fit your style. Side mounts maximize the area of your staircase while providing safety and functionality.

CURVED GLASS BALUSTRADE

CURVED GLASS BALUSTRADE

CURVED GLASS BALUSTRADE

Our Curved Frameless Glass Balustrades are expertly crafted from 12mm toughened safety glass, delivering both structural integrity and refined elegance. Designed to follow the natural flow of your architecture, they can be installed recessed, side-mounted, or floor-mounted to suit your project requirements. Using state-of-the-art measuring technology, we capture precise dimensions of curved staircases, landings, balconies, terraces, and walkways. This meticulous approach ensures a flawless fit and a seamless visual flow, enhancing both form and function.

STAINLESS STEEL BALUSTRADE

STAINLESS STEEL BALUSTRADE

STAINLESS STEEL BALUSTRADE

The Stainless Steel Balustrade systems are made from high quality 304 stainless steel. There are various options to choose from with combinations of round or square posts and tube or cable horizontal dividers.

We also provide options of brushed stainless steel or coloured powder coating.

SPECIALISTS IN FRAMELESS GLASS, STEEL & ALUMINIUM PROJECTS

At Capra Projects, we take pride in creating frameless glass, architectural steel, custom staircase, and aluminium door and window solutions that are both functional and visually refined. We approach every project with a hands-on mindset, focusing on precision, detail, and clean design to bring each space to life.

We work closely with our clients, architects, and builders to ensure every project is carefully considered—from concept and design through to fabrication and installation. Whether it's frameless glass balustrades, aluminium doors and windows, custom staircase design and construction, or architectural steelwork, our goal is to deliver results that feel seamless, modern, and built to last.

For us, it's not just about installation—it's about creating spaces that feel open, considered, and effortlessly integrated, with a strong emphasis on quality craftsmanship, structural integrity, exceptional finishes, and attention to detail.

INSPIRED BY DESIGN. DEFINED BY DETAIL. TAILORED TO PERFECTION
